

## SUGARDOCTOR

Eefje Suijkerbuijk and Kooje Docter form the female makers-duo Sugardoctor who together question all that is taken for granted nowadays. They write, direct and produce together.

By means of personal stories, Sugardoctor slices and dices systems in our society and asks the question: what drama occurs when a woman tries to change the game or no longer participates in the big picture? Zooming in on hidden motives and unspoken feelings make stories with familiar uncomfortable situations and an awkwardly black sense of humor from a female perspective.
